Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS - 'I don't know if my answer was accurate enough.' - 'Did I sound confident?'	THINKS - 'I hope I didn't use too many filler words.' - 'Are my explanations matching industry standards?'
PERSONA NAME (Role / User Type)	
DOES - Practices answering questions out loud. - Records themselves but struggles to analyze the recording.	FEELS - Anxious about upcoming interviews. - Frustrated by lack of actionable, objective feedback.
